

## **International Call for Financial Support**

The “St. Anargyron-Kamatero Anarchist Initiative” is a political collectivity formed back in 2016 which takes action in the Western suburbs of Athens. It is aired by the ideology of Anarchism, it is guided by Anarchism’s libertarian worldview and fights for the distribution and execution of its revolutionary arguments.

Team’s activity includes: interventions in neighborhoods, in labor spaces and schools of the area where we’re propagandizing the anarchic ideas and our political view for the Social Revolution. The team also agitating for the construction of another, classless and stateless society, for the attendance in local fights and for the organization of social resistances. Simultaneously, it participates in central political actions, demonstrations, strike mobilizations, class claims etc attempting to interlinks local and central action. It publishes economic and political analyses, expressed for the current affairs and supports with ideological texts the federalist and revolutionary organization of Anarchists. Every 3 months the Initiative collects its material and distributes it in the form of a free anarchist pamphlet (“Texts’ Anthology”).

The ultimate goal of the team is the contribution in the development of a libertarian revolutionary movement. Essentially, is the topical, regional and central union of Anarchists in a federalist revolutionary organization and the creation of a contemporary, revolutionary program for the social change, based on the arguments of Anarchism. In the same context, we propose the international communication between anarchic collectivities and organizations, solidarity and cooperation between them, towards our mutual goal the universal reorganization of the Anarchist Movement and its reappearance to the historical developments of our time, in a leading role.

Nowadays, even though the most adverse social and economical circumstances of the Pandemic we live in, the initiative continues to stay faithful in her ideas and proposals. Despite, the special condition of the “lockdown” we’re in, the struggle for the Cause will not be quarantined. Our goal is the expansion and empowerment of Anarchic action inside our Class, for the desperately-needed Social Revolution to be an area of concern for society itself and not only a revolutionary minority of political “pioneers”. We come from and represent the working class, we will struggle through it and only for it, with aiming to contribute into the liberation of the social base from the economical, political and social elite. Exactly because we desire to implement and increase our social interventions in the context of our neighborhood, but also looking forward to the central current affairs, we consider necessary the creation of a political and social establishment which will be governed by the Anarchic imperatives and it will spread the Anarchic views in a broader range of people.

The pandemic period however, comes to intensify still more the economic slumping and the social alienation based on the “individual responsibility” and as a result we cannot use a wide range of means for the collection of economic resources through self-organized events, publications etc. Meanwhile the release of our quarterly pamphlet is very limited because of the prohibition of aggregations that the greek government has imposed the last month. For this reason we began a campaign for the voluntary economical support of our team both in the Greek anarchist/anti-authoritarian political space as well as internationally with two corresponding texts (greek and universal) in each direction.

In the Class War, where we found ourselves, our enemies are equipped with money, mass media, technology, legislature and military institutions, that we should overcome with our own ways, with our means, with our own ethics. We DO NOT believe that “the end justifies the means”, thus we support our beliefs for the volunteerism, the solidarity, altruism and comradeship first of all in our every-day life with our choices and actions.

The 'St.Anargyron-Kamatero Anarchist Initiative' is composed of workers, unemployed people, university students, or else individuals who support willingly the team in which they participate and also by extension support to the distribution of anarchic ideas, in difficult economic circumstances and with the new episode of Crisis to be on its first phase. At this point, there is this balance scale in which the first side refers to the quality of life and the other one to the faith in the anarchic struggle and the subversion of capitalism and state. For us, this scale tilts the balance heavily in the last side.

Thus, having faith in the comrades, around the world, for their own scale we published the texts of calling for economic support in nationwide and worldwide level, addressing to the anarchic collectivities, organizations and federations, in the workers' unions of social base, in youth political centers and in the social political spaces and finally , to all the strugglers, the friends and colleagues to contribute in our effort. We consider that the collaboration and the mutual aid are basic characteristics of Anarchism and with this action we aim to point them out. The collected money, as said above, will be given for the creation of political establishment that will host and propagandize the ideas of Anarchism. Simultaneously, we will support through this economic strengthen our direct political propaganda such as the publication of texts, the purchases of materials for our public actions, the fixing of sound system for social interventions and other needs of economic nature that appear in those processes.

Those who desire to support us financially can contact us through the email below. Those who are interested for a more extensive report on the views of our collectivity, on its proposals, on the way of its action and its goals, we can translate and promote our texts in English, after contact. We would be immensely glad in the case of international political acquaintance.

Comradely,

**St.Anargyron-Kamatero Anarchist Initiative**
